PROJECTS

Booking App
Web Development
1. The app is a Hotel Booking platform that allows users to login, create profiles and book rooms.
2. Admins have full control over all aspects and can manage hotels and users through an admin dashboard.
3. The backend uses technologies such as bcryptjs, , express, mongoose, stripe, and nodemailer, among others.

Disaster Management System
Application Engineering Development
1. The Disaster Management System project provides assistance from various organizations to disaster victims.
2. The project uses an event direction system to centralize emergency services and provide aid based on need.
3. Events are categorized and prompt action is taken through the centralized system.

LEADERSHIP SKILLS

Indian Society of Technical Education: General Secretary (2021-2022), publicity head (2020-21)
